

Urgent Support Bulletin

Trimble recently started distributing “Zephyr Model 3” antennas. They look identical to the “Zephyr Geodetic Model 2” but there is a **CRITICAL HEIGHT** difference. Our findings have shown that changing the antenna without resetting the base using the latest version of SCS900 (v. 3.60) could result in a .07’ error. If you have questions, please do not hesitate to contact support at 833-4SITECH or 404-505-8181.
